Summary

Computer Science undergraduate specializing in Python development and backend engineering with strong exposure to software testing and automation. Skilled in designing scalable applications, API integration, and test case validation. Familiar with Agile methodologies, CI/CD concepts, and cloud-based environments. Passionate about building efficient solutions through test automation, defect analysis, and collaborative development practices.

Education

B.E. Computer Science & Engineering

Adhiyamaan College of Engineering (2022 – 2026)

CGPA: 7.4

Skills

- **Programming:** Python (Pandas, NumPy), Java, C, C# (basic)
 - **Software Development & Testing:** OOP, Data Structures & Algorithms, Debugging, Troubleshooting, Test Case Design, Functional Testing
 - **Backend & APIs:** REST APIs fundamentals, HTTP protocols, JSON ingestion, API integration, Postman testing
 - **Databases:** MySQL, MongoDB, SQL Server (basic), PostgreSQL (basic), Snowflake (basic)
 - **Cloud & DevOps:** Azure Portal, Azure DevOps (basic), CI/CD concepts, Agile/Scrum
 - **Tools:** Source Code Control Systems, Bug Tracking Tools, Continuous Integration Tools
 - **Visualization:** Excel (advanced), Tableau (basic), Power BI (basic)
 - **Soft Skills:** Communication, Team Collaboration, Problem-Solving, Analytical Thinking
-

Projects

Data Pipeline Automation (Academic Project)

- Developed Python scripts to process large datasets using Pandas and NumPy.
- Integrated JSON APIs and automated ingestion workflows with Postman testing.
- Designed functional test cases to validate data ingestion and transformation.

Unified Marketplace for Surplus

- Built a Java/MySQL web application with structured data handling.
- Applied backend logic for efficient data storage and retrieval.
- Designed test scenarios to validate database queries and application workflows.

Fresh Market Online Grocery Store

- Designed a prototype with HTML, CSS, and JavaScript.
- Conducted usability testing and consumer behavior analysis.

Certifications

- Full Stack Development – Infosys Springboard
- DevOps Automation – Certified
- AI Fundamentals – IBM Skill Build

Strengths

- Strong proficiency in Python for backend development and automation.
- Familiarity with REST APIs, microservices concepts, and containerization.
- Exposure to cloud environments and DevOps practices.
- Effective communicator and collaborative team player.
